SNOW CRAB

Since 1967, P. Janes & Sons has been processing the delicate snow crab for world-wide consumption. The snow crab is harvested from the sparkling Atlantic Ocean around Newfoundland and Labrador, then packaged in forms and sizes adaptable to just about any use.

You'll recognize the snow crab first by its distinctive appearance. Long, flat legs and ample claws contain a meat heralded for its sweet, delicate flavour. P. Janes & Sons processes a variety of

pack styles such as whole cooked, sections, claws and ready to eat shelled meat. All products are carefully handled at every stage, from harvesting through processing. To maintain quality and freshness, snow crab from P. Janes & Sons is quick-frozen and lightly glazed. Serve it hot or cold, it adds appeal to any meal.

Select a  snow crab product that suits your needs. Or inquire about our custom packing and private labelling.
